Laboratory Outsourcing

Optimizing Operations Through Improved
Technical Delivery & Cost Reductions

**BUREAU
VERITAS**

Laboratory Outsourcing

Any company that has an in-house analytical laboratory has the option to outsource the running of the facility to a third party whose core business it is to manage and develop laboratories - thus lowering running costs and capital expenditure. Quality control may also be improved through the introduction of rigorous audit programs and using resources available within a larger network of laboratories, such as dedicated compliance HSE and quality management.

In addition, outsourcing the laboratory can lead to more investment in new technology reducing turnaround times and lowering costs per-unit of analysis.

Bureau Veritas' laboratories are able to support clients requiring third party analytical services within a wide range of industrial markets or who are looking to outsource their quality control requirements on-site. We operate under the most stringent quality and HSE controls and hold accreditations including ISO 9001, ISO 14001 and ISO 17025.

Key Features

Operational size

Operational excellence and lean processes

Transition of full financial and operational responsibility

Global laboratory network of professionals

Technical leadership and best practice sharing

Customer Benefits
